

Is your business' security hanging by a wire?

Avoid a failure to communicate...

make sure you still get help in an alarm or emergency

even when old phone lines are damaged or discontinued by the phone company

StarLink[®]

Protect Your Business from a Failure to Communicate in an Alarm or Emergency...

Traditionally, in an alarm or emergency, your alarm system detects it, and reports it via phone lines to the alarm monitoring station, to get you fast response and help from the proper authorities.

But did you know, every day more of those old phone lines are being retired, replaced and no longer repaired by the phone company and your alarm system could go offline without notice or even without you knowing?

The Days of Old Phone Lines Are Numbered!

- #1** As of Jan 2018, telephone companies are no longer required by the Government to maintain or keep old POTS or PSTN lines working
- #2** In the event of a storm or accident, phone lines prone to damage, are no longer replaced
- #3** Old phone lines and networks are too expensive for phone companies to fix/maintain and are being retired or phased-out neighborhood by neighborhood, right now
- #4** Because the supply of POTS/PSTN landlines is low, they're increasingly expensive

...Add StarLink, Save Time & Money

You Don't Need a New Alarm System, Just a New Way of

StarLink, a leader in universal wireless alarm communications, created a new way of communicating with your security or fire alarm system for the 21st Century and beyond, using today's fast cellular technology for remote alarm reporting and emergency response.
