

Is your security hanging by a wire?

Avoid a failure to communicate...

make sure your health-care facility gets help in an alarm emergency

even if old phone lines are damaged or discontinued by the phone company

StarLink[®]

Protect Your Healthcare Facility from a Failure to Communicate in an Alarm or Emergency...

Traditionally, in an alarm or emergency, your alarm system detects it, and reports it via phone lines, to get you fast response and help from the proper authorities and onsite security staff.

But did you know, every day more of those old expensive leased phone lines are being damaged, by storm or accident, and not replaced, but "retired", i.e., no longer repaired by the phone company, jeopardizing response to your facility in an emergency?

The Days of Old Phone Lines Are Numbered!

- #1** As of Jan 2018, telephone companies are no longer required by the Government to maintain or keep POTS or PSTN lines working
- #2** In the event of a storm or accident, phone lines prone to damage, are no longer replaced
- #3** Old phone lines and networks are too expensive for phone companies to fix/maintain and are being retired or phased-out neighborhood by neighborhood, right now
- #4** Because the supply of POTS/PSTN landlines is low, costs are increasingly high

...Add StarLink, The Rx for Security

You Don't Need a New Alarm System, Just a New Way of

StarLink, a leader in universal wireless alarm communications, created a new way of security for the 21st Century and beyond, using today's technology for local security staff and remote alarm reporting and emergency response.
