Introducing **Napco Access**:
Feature rich, easy to integrate
and a snap to use – scalable
for 2 doors up to 128

New NapcoAccess™ Access Control Systems are full-featured cutting edge, easy-to-use systems for 2 to 128 doors, and can be integrated seamlessly with or without Napco Gemini Alarm Systems. The full line consists of NAX-200X Controllers, AccessPro™ Software and Badger Video Badging Software, providing access for up to 10,000 badges and 256 access groups, permitting up to 2 access groups per badge. The system is easy for security professionals to implement, supporting many reader options and boasting reliable, low-maintenance access panels. And it is simple and intuitive for the enduser, featuring custom personnel fields, 128 schedules, 50 holidays, IT friendly-security and more.

Offer affordable and easy to implement access control with intelligent security made simple by Napco, available at the Napco Independent Distributor near you

2-Door access controller with power supply

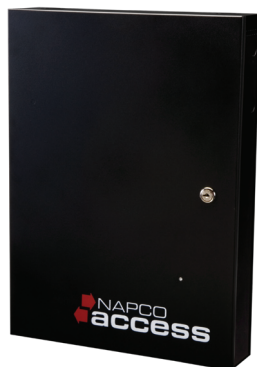

NAX-200X

- 2 door access controller panel, supports 2 readers and up to 10,000 cards. 8 EOL supervised alarm inputs, tamper, 5 relay outputs. Locking metal enclosure, includes power supply and serial comm. cable. UL294 and CUL listed.
- Expandable up to 128 doors, 64 panels, maximum capacity
- Integrates seamlessly with Napco Gemini Alarm Systems (GEM-P3200, -P9600, X255)
- Includes serial communication cable for PC-to-panel connection
- Also supports network/LAN communications using optional **NAX-ENET** ethernet adapter interface board (for communications over TCP/IP).

Expansion for NAX-200X

NAX-200XIO Expansion Board in Enclosure

- 16 supervised inputs, 16 relay output expansion board and locking enclosure with power supply/charger for NAX-200X.
- Includes 1 NAX-200XIOBD (16 supervised alarm inputs, 16 relay outputs.) For added expansion, doubling inputs/outputs, add 2nd IO Board, below.

NAX-200XIOBD Secondary Add-on Board

- Additional 16 supervised inputs, 16 relay outputs expansion board for use in NAX-200XIO.
- For up to 32 supervised alarm inputs & 32 relay outputs, max.
